

## 03 Apps Which Every Indian Lawyer Should Download In 2018

I must say it is a tricky question and answering this would not be an easy task as well.

For last couple of months, I have been getting a lot of questions regarding android & IOS apps which a lawyer or a law firm should download.

As many of my readers are lawyers or run a law firm, and in this 21<sup>st</sup> century we all need a mobile application which can ease our work. However, getting one is not that easy. As most of the options which are available in the market are either worthless or filled with advertisements or even if they are good then you have to pay to use their services.

So today with this article, I will tell you some of the best or the top 3 apps which every Indian Lawyer or a Law firm should have in 2018.

### 3. Lawyer Diary App

Lawyer Diary App or also known as LDA is comparatively a new app but don't go by its newcomer tagline as this new application has some amazing features, which might give a run for money to already existing apps.

Lawyer Diary app is an application for both Apple and Android users and is a combination of a digital diary and an electronic personal assistant. With the help of this app you can easily monitor the progress of all the Court Halls in High Courts. Being a personal assistant, the app periodically send SMS alerts and IOS & Android push notifications on appointments, important to-do items, case hearings and also sends just-in-time notifications just before your case reaches in the court hall. Making a one stop shop for all Lawyers and Law firms to store, manage and access every important detail about their clients and their running cases.

### 2. Indian Bare Acts (Law Books)

In the second spot of this list is Indian Bare Acts (Law Books) and now the question is why so?

So let me tell you that this is the only app which will help you to leave your bulky books at home. Yes, you don't need to carry those 5000 pages law guides & books everywhere you go.

The app comes with the five essential bare acts:

- Indian Evidence Act,
- Criminal Procedure Code,
- Indian Penal Code,
- Code of Civil Procedure and
- Service Tax law

Not only this, the application also talks about its chapters and the sections of these acts. In addition to it, you can even bookmark certain sections and can even highlights texts and paragraphs which you find important.

### 1. Indian Laws App

It is very hard to remember each and every law and its sections. And that's not it, you need to remember the updates as well. That is a hard task even for a pro Lawyer.

Trust me, remembering thousands of laws and their amendments is impossible unless you have a photographic memory. For the rest, you have the Indian Laws app which includes both the Indian Penal Code and Indian Constitutional Laws and their sections.

The best part of this application is that it provides a search bar where you can type the name of the law and can know more about that without wasting much time looking for it in a book.
